

SKILLS

- **Programming Languages:** C, Python, JavaScript, C++
- **Web Development:** HTML, CSS
- **Databases/Tools:** DBMS (SQL basics), Git, GitHub, Figma
- **Core Concepts:** Problem Solving, Team collaboration, Time management, Adaptability

PROJECTS

Li-Fi Data Transmission Using Visible Light Technology

- Engineered Li-Fi VLC prototype to transmit high-speed digital data via modulated LED signals.
- Designed optical transceiver circuits using LEDs and photodiode sensors for wireless transfer.
- Implemented real-time encoding/decoding for accurate digital-to-optical signal conversion.
- Optimized short-range links to benchmark Li-Fi as a high-bandwidth RF alternative.
- Integrated hardware circuitry to ensure stable signal detection under indoor conditions.
- Evaluated system performance across varying distances, alignment, and ambient light interference.
- Technologies/Components: Arduino, LED, Photodiode, Visible Light Communication (VLC), Embedded C/C++, Electronic Sensor

Community Development Project

- Delivered structured Python coursework to school students, covering core fundamentals including syntax, data types, loops, and control flow.
- Designed interactive coding modules and hands-on exercises tailored to simplify abstract computer science concepts for beginners.
- Mentored learners in algorithmic thinking through real-world problem-solving challenges and live debugging sessions.
- Assessed student progress via coding evaluations and targeted 1-on-1 support to reinforce programming confidence.

TRAINING

C Programming & Database Management Systems

- Trained in C programming, covering core syntax, pointers, memory structures, and file I/O through hands-on coding labs.
- Built algorithmic problem-solving skills by implementing logic puzzles and data structures in C.
- Trained in relational DBMS principles, focusing on schema architecture, ER modeling, keys, and normalization techniques.
- Practiced structured querying with SQL, utilizing DDL/DML commands, multi-table joins, subqueries, and aggregate functions.

CERTIFICATIONS

- | | |
|---|----------|
| • Cybersecurity Certification Infosys | AUG 2026 |
| • Python Programming Certification Infosys | SEP 2026 |
| • Anger Management Certification Apnavidalaya | MAY 2025 |

ACHIEVEMENTS

- Solved 200+ programming problems in C, strengthening problem-solving, logical reasoning, and algorithmic thinking skills.
- Practiced 100+ DBMS and SQL problems, building proficiency in database concepts, query writing, joins, normalization, and data manipulation.
- Demonstrated consistent hands-on practice across programming and database technologies through structured problem-solving and coding exercises.

EDUCATION

- | | |
|--|------------------------|
| • Lovely Professional University (6.19 CGPA) | Jalandhar, Punjab |
| <i>Bachelor of Technology-Computer Science and Engineering</i> | 2025 – 2029 (Expected) |
| • Harrow English School (81%) | Darbhanga, Bihar |
| <i>Higher Secondary Education</i> | 2023 – 2025 |

- **Holy Cross School (85%)**
Secondary Education

Darbhanga, Bihar
2022 - 2023
